-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

1. Claims 13 and 21 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The inclusion that the payload is "a semiconductor chip magazine" does not limit the methods of claims 6 and 15.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 5, 6, 8, 9, 13-15, 17, 19-22 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Saito (5,941,678).

Saito discloses a material transport mechanism that includes a rail-mounted vehicle (10b), a horizontally extendible portion (10c), a vertically extendible portion (10i), and a gripper mechanism (10s). The transport mechanism allows material to be transported from one position to another position. The horizontally extendible portion (10c) moves to position the vertically extendible portion (10i), and the attached gripper mechanism (10s), proximate a target location. The vertically extendible portion (10i) maybe moved vertically to let the gripper mechanism grasp/release the material. The vertically extendible portion (10i)

Art Unit: 3612

includes slides (10ja/10jb) that engage members (10e,10r). A controller (10d) communicates with sensors (10t,10ub) and the vehicle assembly to properly position vehicle.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Saito (5,941,678) in view of Hanaya (5,749,693).

Saito does not disclose the claimed type of communications system.

Hanaya teaches the use of infrared positioning sensors in a conveyor system.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use infrared sensors, as taught by Hanaya, as the communications system in Saito as an obvious expedient.

Allowable Subject Matter

5. Claims 7, 10-12, 16, 18, and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
